RE: Heleva Landfill - Superfund

Dear Joe:

Pursuant to the 106(a) Order, paragraph 18, York Laboratories, a Division of Y.W.C., Inc., in Monroe, Connecticut, is the laboratory that will be conducting analyses of samples. All samples will be analyzed for priority pollutant volatile organics within seven calendar days from the time sampled.

Attached is a list of all residents that are using wells and a list of residents that could not be contacted. A second attempt will be made during the sampling campaign and sampling done if access is permitted.

If you have any questions, please let me know. I also understand that the Order has not yet been signed by the government even though we were advised by USEPA that it would be signed on February 15, 1985. This is also to confirm that all of my client's efforts so far and that which will be done is in a good faith effort to comply with the spirit of the Order, without any admission of liability and without prejudice to any position that may be taken by my client should the Agency not execute the Order.

Cordially,

William J. O'Brien
